Your initial call...

To simplify arrivals, it would be helpful if you would make your initial call to Camrose Unicom on 122.8 at 1500' AGL or 4000' AMSL, over one of the four reporting points shown on the map. At that time, you will be advised of the active runway, wind conditions and barometric pressure. Please plan to join the circuit overhead or on extended downwind. With traffic expected, entries from 45° downwind, base leg and straight in approaches are discouraged. All circuits are left hand. Thank you for your cooperation!

Ground Marshalling

The Camrose Flying Club would like to increase your awareness that this Fly In Breakfast will be attended by the GENERAL PUBLIC. Many people (including CHILDREN) in and around the Airport Facilities are unaware of Aircraft operations and hazards.

For the safety of all attending, please follow these guidelines.

- Be on the lookout for the general public at all times.
- Be prepared to shut down while taxiing if needed.
- You have the right to refuse parking that is not suited to your aircraft.
- Shut down and push aircraft into parking stalls (Marshalls will assist you).
- We encourage all pilots to use the assistance of a Marshall to ensure the area is clear on start up.
- Marshalls will be on hand to assist in Fuelling of Aircraft.
